FAX: 212-351-3401

Leslie Spencer is a trial litigator with over 20 years of experience handling patent infringement disputes. She represents clients in federal court as well as the Patent Trial and Appeal Board (PTAB). Ms. Spencer is a registered patent attorney whose matters cover a range of technologies, including computer software (including artificial intelligence and blockchain), data encryption and security, network communications, semiconductor design and manufacturing, automotive systems, Fintech, medical devices and healthcare information technology. She also advises clients on intellectual property strategy, asset protection and transactions.

Ms. Spencer's recent work included helping Dolby Laboratories resolve a multi-jurisdiction dispute involving ten digital rights management patents asserted by Intertrust Technologies against Dolby and its cinema customers. Intertrust claimed \$2 billion in damages. Dolby, an innovator in digital cinema technology, successfully challenged Intertrust's patents in *inter partes* review (IPR) proceedings, and with strong motion practice in district court.

Ms. Spencer was also part of the Desmarais team that helped Lenovo successfully defend a patent infringement action in the Western District of Texas. Non-practicing entity ACQIS LLC asserted nine patents related to high-speed interconnects for computer modules, and accused a large variety of Lenovo-branded computers. Ms. Spencer and the team positioned Lenovo for pre-trial resolution, including with motion practice on the preclusive effect of a related Federal Circuit decision.

Ms. Spencer was recognized by *Benchmark Litigation* among the "Top 250 Women in Litigation" in 2021, 2022 and 2023, and as a New York Metro "Super Lawyer" in 2023 and the ten preceding years. In 2022 and 2023, she was also named as a *Managing Intellectual Property* IP Star and listed in *IAM Patent 1000* rankings. In 2018, she was part of the team honored by Financial Times Innovative Lawyers for developing a blockchain transferable software license. Ms. Spencer was also recognized as one of the "Top Women in Law" in 2016 by the *New York Law Journal* and one of the "Top Women Attorneys in the New York Metro Area" in 2014 by the *New York*

EDUCATION

Temple University, Beasley School of Law, LL.M., Trial Advocacy, 2006

New York University School of Law, J.D., 1998

University of Michigan Ross School of Business, M.B.A., 1988

Massachusetts Institute of Technology, B.S., Computer Science and Engineering, 1985

ADMISSIONS

2001, New York

Registered to Practice before the United States Patent and Trademark Office

Times Magazine.

Prior to joining the firm, Ms. Spencer was a partner in the New York City office of an international law firm where she practiced intellectual property litigation, and was co-chair of the firm's diversity committee. Before launching her legal career, she worked as a software engineer in the financial services and defense industries, and helped to develop a smart card-based secure transaction system.

Representative Matters

Representative Patent Matters (Defensive)

- Defending a leading consumer electronics company in a patent infringement action in the Western District of Texas (WDTX) related to encryption of digital identity data using a microprocessor identifier.
- Representing Cisco in a patent infringement action in the Eastern District of Texas related to network access and management technology.
- Represented Dolby Laboratories in action for declaratory judgment of non-infringement, and related IPR proceedings, respecting ten digital rights management patents asserted against digital cinema equipment.
- Represented Lenovo in WDTX patent infringement action related to high-speed interconnects between computer modules.
- Defended a major U.S. auto manufacturer in patent infringement litigation involving adaptive cruise control technology.
- Defended a leading technology company in a patent infringement

case related to remote collection of exercise-related data.

- Defended a global information and communications technology company in an action alleging infringement of five patents directed to methods for user input and communication in mobile devices.
- Defended enterprise technology company in a patent infringement matter relating to databases for large language models.
- Defended a large bank holding company in multi-district litigation (MDL) involving assertion of integrated circuit and secure transaction patents against mobile banking. Also represented client in petition for Covered Business Method (CBM) review before Patent Trial and Appeal Board.
- Defended a major provider of human resources management software and services in patent infringement action, and invalidated patent for unpatentable subject matter under *Alice* decision.
- Defended a major provider of human resources management software and services in multi-jurisdiction infringement action involving patents directed to electronic accounting and procurement methods asserted against oil field service providers. Obtained summary judgment of non-infringement in client's Southern District of Texas declaratory judgment action. Also represented client in related reexamination proceeding.
- Defended major insurance company against assertions of infringement involving patents related to insurance underwriting based on vehicle operating data ("telematics"). Also obtained stay pending CBM review.
- Represented a major U.S. pharmaceutical company in multi-defendant NPE litigation involving patents related to network security, user and server authentication methods.

Representative Patent Matters (Offensive)

- Represented a Japanese patent fund in infringement action asserting eight patents directed to semiconductor manufacturing technology.
- Represented a major entertainment technology company in an International Trade Commission (ITC) investigation involving patents relating to interactive program guides, and related IPRs proceedings.
- Represented a global electronics and telecommunications company in patent infringement litigation asserting patents covering various technologies including computer graphics application programming interfaces (APIs), instant messaging and mobile application updates.

Other Representative Matters

- Represented a leading financial software and media company in a trade secret case concerning automated trading software systems.
- Represented The Center for Democracy and Technology, The Electronic Frontier Foundation, and The National Consumers League *amici curiae* before the U.S. Supreme Court in *Frank v. Gaos*.
- Assisted in draft of blockchain-transferable software license, Deconet Software License Agreement, to be purchased using BTC or ETH, and recorded on the Ethereum blockchain.
